Abstract (en)

[origin: WO2014086957A1] What is represented and described is a wall block (1) for a wall system (10), having an upper part (2), which comprises the upper side of the wall block (1), and having a lower part (3), which comprises the lower side of the wall block (1), wherein the wall block (1) has at least one spacer (7) on the upper side thereof and/or on the lower side thereof, and also a wall system (10) and a method for erecting a wall system (10). In order to make it possible for the wall to be produced in an advantageous manner and to have high stability, it is proposed that the upper part (2) and the lower part (3) of the wall block (1) are offset laterally relative to one another.
