Abstract (en)

[origin: WO2014086882A1] The present invention relates to a compressor (1) comprising a suction muffler (8) that provides decrease in the temperature of the refrigerant used in the refrigeration cycle in refrigerators and attenuation of the noise originating from the refrigerant and produced from plastic material, and wherein the amount of oil transferred to the refrigeration cycle is decreased by separating the oil mixed in the refrigerant that passes through the suction muffler (8).
