Abstract (en)
[origin: WO2014091119A1] The invention relates to a support (5) for a cooking vessel, comprising a plurality of wings (25). The wings (25) are arranged in such a way as to at least partially define a free site (27) to be positioned over a burner (3) of a hot tray (1). Two consecutive wings (25) from the plurality of wings (25) define an opening (37) between each other. The support (5) for a cooking vessel is characterised in that an outer surface of each wing (25) has a concave form, and in that the concavity of the outer surface (29) of each wing (25) is oriented away from the free site (27).
