Abstract (en)
[origin: WO2014086914A1] Photovoltaic module at least comprising: - a laminated composite assembly comprising rear plate (2), photovoltaic layer system (3) and front plate (1) arranged one above another, - at least one contact element (9) in at least one contact hole (5) of the front plate (1) and/or of the rear plate (2), - at least one busbar (13) which electrically conductively connects the photovoltaic layer system (3) to at least one contact element (9), and - at least one junction box (7) which covers the at least one contact hole (5) with contact element (9) and is fixed to the front plate (1) and/or rear plate (2), wherein - the contact element (9) is electrically conductively connected to the busbar (13) via a contact area (15), - the busbar (13) has a tin plating (16), and - the diameter of the tin plating (16) is from one to two times the diameter of the contact area (15), - the contact element (9) comprises at least one contact pin (9.1), a contact counter part (9.2) and a spring (9.3), and - there is a soldering-free, clamping connection between the contact element (9) and the busbar (13).
