Abstract (en)
[origin: WO2014090572A1] The invention relates to embodiment examples relating to a concept for an elastically deformable piece of sporting equipment (300), which comprises at least one deformable electromagnetic coil structure (200) around a curved surface (202) within the piece of sporting equipment, such that the at least one electromagnetic coil structure (200) forms a three-dimensional curve having non-vanishing geometric coiling and curvature in order to create an extension reserve that is matched to a maximum deformation of the piece of sporting equipment.
