Abstract (en)
[origin: CA2891381A1] The invention relates to a roller press for crushing, compacting and/or briquetting material, comprising a press frame (1) and comprising two pressing rollers (2, 3) rotatably mounted in the press frame, wherein the press frame (1) receiving the pressing forces has a frame upper part (6) and a frame lower part (7) and also head pieces (13, 14) connecting the frame upper part and the frame lower part. This roller press is characterized in that the frame upper part (6) and the frame lower part (7) are connected to one another by way of at least one movable intermediate support (15), which is arranged between the head pieces (13, 14), supports the frame upper part (6) with respect to the frame lower part (7) when the press frame is open and can be transferred from an operating position into a roller removal position, and vice versa.
