Abstract (en)

[origin: US2015147430A1] Adapters for consumable product packages and methods of using same are provided. The adapters are designed to provide functional features to packages that are not structurally capable of providing such functions. The functional features may include, for example, spill-resistance, flow-control, ease of use, etc. In a general embodiment, the adapters of the present disclosure include a valve comprising an outlet and a cap that is so constructed and arranged to seal the valve. The valve is so constructed and arranged to provide a functional feature and to attach to a package fitment. In another embodiment, packages are provided that include two-component adapters configured to provide specific functional features to the packages.
