Abstract (en)
[origin: WO2014090733A1] The invention relates to a refrigeration appliance comprising a cooling chamber inside which a shelf (106) is arranged. A bottle holder (108) which includes a stationary bracket (312) and a bracket (314) that can be pivoted between an operational position (II) and a non-operational position is secured to the shelf (106). According to the invention, a bottle support (318) is associated with the stationary bracket (312) or the pivotable bracket (314).
