Abstract (en)

[origin: WO2014090503A1] Disclosed is an adapter plate for a heat exchanger arrangement, a first heat exchanger being provided through which a first fluid and a second fluid can flow and which can be mounted onto the adapter plate, the adapter plate having a first flow channel for supplying the first heat exchanger with the first fluid and a second flow channel for removing the first fluid from the first heat exchanger and a third flow channel for supplying the first heat exchanger with the second fluid and a fourth flow channel for removing the second fluid from the first heat exchanger, the adapter plate having a fifth flow channel for supplying a second heat exchanger with the first fluid, the third flow channel being provided for removing the first fluid from the second heat exchanger. The embodiment as per the invention constitutes a cost-effective solution for fulfilling its purpose and requires no further installation space while significantly reducing weight.
