Abstract (en)  
[origin: WO2014095001A1] The invention relates to a method for securing a transaction (T12) in a reputation system (100; 200), comprising the following steps: authenticating (S3; T1; T3) a user (1; 2) with respect to a terminal (20; 20') by means of an electronic proof of identity (10; 10') in order to enable authentication data (24; 26) for the digital identity that are stored on the terminal (20; 20') and authenticating (S6; T7; T8) the digital pseudonym associated with the user (1; 2) with respect to the reputation system (100; 200) by means of the terminal (20; 20') by using the stored authentication data (24; 26) that concern the digital pseudonym. In particular, the electronic proof of identity (10) can be an electronic identity card in the form of a portable data carrier.
