Abstract (en)  
[origin: CA2894427A1] The invention relates to a gaming device comprising a vertical housing (1) for receiving a game sequence controller (9), an upper front flap (16) and a lower front flap (17), the upper front flap (16) being used to mount at least one screen (19) for displaying games that can be controlled using the game sequence controller (9) and the two front flaps (16, 17) being mounted on the vertical housing (1) such that they can pivot in opposite directions to one another and being lockable relative to one another when closed.
