Abstract (en)

The invention relates to a continuous web for producing bags made of plasticised paper and including a plate,, for fruit and vegetable products and the like, produced with plasticised paper on at least one of the faces thereof, incorporating a rectangular plate in the base of the future bag, that can be made of plasticised cardboard. The continuous web can comprise at least one window that can be closed with fragments of polyethylene network and reinforcements on the periphery of the windows and in the areas of the joints by means of thermowelding or a similar joining method.
