Abstract (en)

A reusable waste receptacle (10) comprising an inner flexible container (12) having an open top end (14) and a closed bottom end (16), and a rigid outer container (18). A collapsible section (20) is provided between said open top end (14) and said closed bottom end (16) and said open top end (14) is enclosed by an attachment section (22). A rigid supporting collar (24) is arranged to attach said attachment section (22) to said rigid outer container (18). The reusable waste receptacle (10) is emptied by pressing said closed bottom end (16) towards and past said open top end (14) while maintaining said open top end (14) in a fixed position in said rigid outer container (18), and then pulling said closed bottom end (16) towards and past said open top end (14) while maintaining said open top end (14) in a fixed position in said rigid outer container (18).
