Abstract (en)
[origin: CN105040311A] The present invention relates to a device for applying liquor to a filament web. The device includes an applying component (3) for the filament web (2), a liquor applying device (4) and a path of a width of woolen goods from the applying component (3) to the liquor applying device (4). The device is provided with a comfortable control ability. The path of the width extends on an operation space (17) of an input sector before the liquor applying device (4) so that the operation space is close to the liquor applying device (4) in a horizontal direction.
