Abstract (en)

[origin: CN104947404A] Domestic appliance comprising an ironing and / or smoothing (1) intended to be hand held and a portable base (2) comprising a surface (21) to move said ironing device and / or crease recovery, the base (2) comprising at least one locking element (4) rotatable between a folded position wherein said ironing device and / or smoothing (1) can be extracted from the base (2) and an immobilizing position in which the device ironing and / or smoothing (1) is immobilized on the base (2) by the locking element (4), characterized in that the base (2) comprises return means (6) exerting a torque on said member blocking (4) whose direction is opposite to the passage of an intermediate position between the stop position and the folded position; said torque exerted by the return means (6) tending to return the blocking member to the retracted position when the locking element (4) is in a first angular range between the intermediate position and the folded position and tending to bring the locking element (4) to the fixing position when the locking element (4) is in a second angular range between the intermediate position and the fixing position.
