Abstract (en)

The present invention relates to a cladding panel (1) for constructing on a supporting wall (8) a cladding formed of lining plates (3), whereby the panel comprises a carrying layer (4) on the one side of which a matrix of rows (2) of lining plates (3), preferably ceramic plates, in particular clinker plates, is arranged. The present invention also relates to a cladding system (6) comprising an insulation layer (7) formed of a number of rectangular prism-shaped insulation plates (71) with inner sides facing a supporting wall (8) and with outer sides covered with a cladding layer (10) formed of a number of cladding panels according to the invention.
