Abstract (en)

[origin: WO2015158405A1] The invention relates to a light (1) comprising: at least one lighting means (6); a casing (2) that surrounds the at least one lighting means (6) and has a light outlet opening (8); a covering element (10) that covers the light outlet opening (8); and a plurality of frame elements (16, 18) that hold the covering element (10) on the casing (2). The light is characterised in that profile elements (14) are arranged on the casing (2), in which profile elements at least one of the frame elements (16) engages, and wherein the frame elements (16) are formed and arranged in such a way that: at least one frame element (16) is exclusively secured by neighbouring frame elements (16, 18) and by engaging in at least one profile element (14); and at least one frame element (16) is formed as a support frame element (18) that is at least also secured by at least one fastening means (26).
