Abstract (en)

[origin: CN104978158A] The invention relates to a method for processing a print job in a printing press (1) with at least one digitally controllable printing unit (8) and a computer (5), wherein a print job includes at least data for at least one print image and process data or commercial data. The invention is characterized in that the computer (5) from the process data or commercial data for the print job created for the image content for a concomitantly end printed product (6) and that this image content on the printing press (1) during execution of the print job is applied to a substrate (7).
