Abstract (en)
[origin: WO2014098665A1] The present invention relates to a stack (1) of web material for hygiene products, for use in a dispenser, comprising at least one continuous web material (2, 3) being Z-folded about transverse folding lines (4), thereby providing panels having a length (L) along said folding lines, and a width (W) perpendicular to said folding lines, said panels being piled on top of each other to form a height (H) of said stack, such that said stack outlines a rectangular parallelepiped having said length (L), width (W) and height (H), and forming six outer surfaces, namely a top and a bottom surface (5,6), being parallel to the panels of said stack (1), two side surfaces (7,8), comprising the longitudinal edges of the web material (2,3), and a front and a back surface (9,10), comprising the folded edges of the web material. The height (H) of the stack is greater than 17 cm.
