Abstract (en)
[origin: WO2014096229A1] The invention relates to a suction element for the therapeutic treatment of a wound on the human or animal body using negative pressure. In particular, the invention relate to a suction element for the therapeutic treatment of a wound, the surface of which comprises a sensitive tissue structure, said structure lying deeply in an uninjured body, using negative pressure. The tissue structure is a blood vessel or a nerve.
