Abstract (en)

[origin: WO2014095487A1] The invention relates to a method for changing the colour of keratinous fibres, comprising the following steps: I) producing the ready-to-use agent directly prior to use by combining a powdery preparation A, containing at least one oxidation dye precursor and at least one pigment that does not change the colour of the fibres and a liquid preparation B, containing at least one chemical oxidant, and subsequent mixing the two preparations, II) distributing the ready-to-use agent onto the fibres, V) leaving the agent on the fibres for a period of 1 to 60 min., VI) washing the remaining agent out of the fibres.
