Abstract (en)
[origin: WO2014097341A1] Machine tool, in particular for the processing of materials or pieces used in the building industry such as tiles or slabs of stone materials, comprising a rotary tool (1) grafted on a spindle driven by a high speed electric motor (2). The said motor (2) is housed, in a predetermined position, in a watertight chamber (3) formed within a containing base (4) which, at its top, has a perforated surface (40) from which protrudes the tool (1) and on which is supported the material or piece to be processed.
