Abstract (en)

[origin: WO2014097278A1] Packing machine (34) and packing method for producing an inner container (3) by folding an inner blank (24) about a wrapped group (2) of tobacco articles; the inner blank (24) is fed along a packing path (P1) by way of a packing conveyor (41) and through a work station (S14) wherein a folding device (48) is arranged, provided with two twin folding bodies (49) that are moved along a work direction (D1) perpendicular to the packing path (P1) for folding portions of the inner blank (24); each folding body (49) has a top member (50), an intermediate member (51), and a bottom member (52) which are arranged in different positions along the work direction (D1) to perform in succession respective folds of the inner blank (24) while the folding body (49) moves with a continuous motion along the work direction (D1).
