Abstract (en)

[origin: WO2014096293A1] The invention relates to a scissor lift, the drive of which has a traction element [6] that loads a scissor element against the other scissor element and is guided in a U-shaped portion. The scissor lift comprises an immersion roller [10] which is mounted on the platform [2] or on the support [1] at a distance from the platform [2] and/or the support [1], said immersion roller being loaded against the U-shaped portion in a position in which the platform [2] is brought closer to the support [1].
