Abstract (en)

[origin: WO2014096596A1] The present invention concerns a facility for storing and dispensing fuels, in particular for motor vehicles, comprising at least one device for dispensing fuel (18), at least one light fuel tank (12, 14), and at least one vent pipe (38), the vent pipe connected to the light fuel tank being provided with an over/underpressure valve (44) and carrying a condenser (40) for condensing petrol vapours coming from said tank. According to the invention, the facility further comprises a dehumidifier (42) for the outside air allowed into the light fuel tank.
