Abstract (en)

[origin: WO2014096326A1] The invention concerns the use of a viscosifying compound for improving the storage stability of a liquid hydrocarbonated fuel. The viscosifying compound is selected from the viscosifying compounds derived from ureas and bis-ureas, alone or in a mixture. The invention in particular concerns the use of a viscosifying compound selected from the viscosifying compounds derived from symmetric or asymmetric ureas and bis-ureas, alone or in a mixture, preferably from among the viscosifying compounds derived from N-substituted ureas and N-substituted bis-ureas, alone or in a mixture.
