Abstract (en)

[origin: WO2014095887A1] The invention relates to the field of coating substrates with abradable materials. It more specifically relates to a process for coating at least one surface of a substrate with at least one ceramic compound, and a coating thus obtained. It also relates to a substrate having at least one surface coated with such a coating. It furthermore relates to a device for implementing the coating process. Applications: fields of mechanical engineering and of aeronautic design.
