Abstract (en)  
[origin: WO2014095389A1] The invention relates to a door system with a non-folded door leaf (10) on which at least two belts (20) are fixed on one side, and with a frame (12) having two vertical legs (14, 16), one of which bears hinges (24) for the belts (20), characterized in that the hinges (24) are arranged symmetrically in height relative to a horizontal centre plane (B) of the frame (12) and that fixing devices (22) for fixing the belts (20) on the door leaf (10) and for fixing the hinges (24) on the frame (12) each have a 180° rotational symmetry relative to a horizontal axis.
