Abstract (en)
[origin: WO2014095526A1] The invention relates to a device (44) for determining the location of a vehicle (2), said device having a position-determining device (6), comprising: - said position-determining device (6) for determining a position (8) indicating the location of the vehicle (2), - a movement-determining device (48) for determining driving dynamics (16) of the vehicle (2), and - a filter device (30) for determining an error (42) in the position (8) of the vehicle (2) on the basis of the driving dynamics (16), - wherein the position-determining device (6) and the movement-determining device (48) are each connected to said filter device (30) via a dedicated line (46).
