Abstract (en)

[origin: WO2014096233A1] The invention relates to a multipoint terminal (1) with current bars (5) for receiving multiple cables to be connected to an electric unit. Multiple electrically conductive connection terminals (4) are provided for multiple cables, and the connection terminals (4) are connected to the current bars (5) in the electric unit in order to further establish an electric connection. According to the invention, the current bar (5) is designed so as to form multiple walls (6) of the connection terminals (4) and a separating wall (7) between the connection terminals (4). In this manner, an easily producible multipoint terminal (1) is provided.
