Abstract (en)
A garment comprises an outer shell (10) and at least one air ventilating system (40). The air ventilating system (40) comprises an air ventilating chamber (50) disposed on the inner side of the outer shell and at least one external air access (30) to said air ventilating chamber (50) to allow external air to circulate within the chamber. An air permeable spacer arrangement (60) is located in the air ventilating chamber (50).
