Abstract (en)

The Loading tool for loading a plurality of goods (30) onto a support arm according to the present invention comprises a holding portion (10), a loading portion (12, 12') adjacent the holding portion, which loading portion receives the plurality of goods via an opening in the goods or their packaging when the loading tool is in use and a longitudinal ridge (9). The loading tool and the loading portion have an elongated shape along a longitudinal direction (A) and the longitudinal ridge extends over the loading portion essentially parallel to the longitudinal direction (A).
