Abstract (en)
The invention concerns a side guard (20) adapted for mounting to a wheelchair (1). The side guard (20) comprises an upper section (21) and a lower section (22). The side guard (20) is characterised in that the upper section (21) is configured for flexing due to a force acting upon it. The invention further concerns a wheelchair (1) provided with such a side guard (20) and a method for manufacturing said side guard (20).
