Abstract (en)
A gas hot air gun head (10) includes a fuel supply device (20) engagable with a gas reservoir (90) and having a fluid inlet end (21), a fluid outlet end (22) and a channel (23) extending from the fluid inlet end to the fluid outlet end. Further, a flow-guiding device (30) connects to the fluid outlet end of the fuel supply device and includes a combustor (31). The combustor connects to the fuel supply device. The combustor includes a combustion chamber (313) extending therethrough. The combustion chamber includes first and second flow-guiding plates (34, 35) engaging therein and separating from each other in an axial direction. The first flow-guiding plate includes a plurality of first holes (341) extending therethrough. The second flow-guiding plate includes a plurality of second holes (351) extending therethrough. A centerline of one of the plurality of first holes offsets from centerlines of the plurality of second holes.
