Abstract (en)

[origin: WO2014102474A2] The invention relates to an application device (16) for applying a cosmetic composition (14), comprising: a gripping element (24); a first head (30) including a first surface (50); a rod (26) connecting the gripping element (24) and the first head (30) and extending along the length of a longitudinal axis (Z); and a second head (32) mounted on the gripping element (24) and comprising a second surface (52). The first (30) and second (32) heads are mounted such that they can move in relation to one another along the length of the longitudinal axis (Z) between an open position in which the first (50) and second (52) surfaces are at a distance from one another and a closed position in which the first (50) and second (52) surfaces are applied against one another. At least one of the first (30) and second (32) heads is an applicator head.
