Abstract (en)
[origin: WO2014127962A1] The invention relates to a hand drier, comprising a housing, which has a drying space accessible from outside, a fan (11), and a plurality of outlet nozzles, which are connected to the fan (11) and oriented in such a way that a drying process can be performed in the drying space, wherein the housing has at least two housing parts (2, 4, 7, 8) arranged adjacent to each other, between which the drying space is arranged and which extend in a vertical direction, wherein the at least two housing parts (2, 4, 7, 8) have the outlet nozzles, which are arranged one above the other in such a way that an air-flow plane (10) spanned by the outlet nozzles extends predominantly vertically.
