Abstract (en)  
[origin: WO2014102210A2] The invention relates to a device (1) for comminuting food, comprising a base part (3), which comprises a receiving element for the cutting part (6) and on which an actuation part (4) can be fixed in an articulated manner such that the actuation part (4) can be rotated in order to push the food (20) which is to be comminuted, against the blade part (6). Said device (1) is characterized in that a food slicer (5) is or can be fixed in an articulated manner to the base part (3) in place of the actuation part (4) or in addition to the actuation (4), or that the actuation part (4) comprises a support (8) on which at least one pressing stamp (7), preferably which can be detached again, is or can be fixed, and that a food slicer (5) forms the support (8) or comprises the support (8).
