Abstract (en)

[origin: WO2014102363A1] The present invention relates to a cooling device (1) comprising a pump (2) that enables liquid to be delivered to the members like water dispenser and/or ice making unit disposed thereon, a liquid delivery tube (3) that enables liquid to be taken into the pump (2) from inside a bottle (B), one end of which is immersed into the bottle (B) and the other end of which is connected to the pump (2), and an adaptor (4) that enables the mouth of the bottle (B) to be closed in a leak-proofing manner by being fitted on the liquid delivery tube (3).
