Abstract (en)

[origin: WO2014102021A1] The invention relates to an arrangement (2) and a method for determining a charge state of an electric energy reservoir (4) when said electric energy reservoir is charged with electric energy during a charging process. In said method, the charge state is determined by means of a characteristic map with the aid of at least one value for a current integral as at least one input parameter and with the aid of at least one value for at least one further input parameter.
