Abstract (en)

[origin: WO2014101972A1] The present invention pertains to a method for providing operational data to a solar panel control device. The present invention provides a method for powering a television with the help of a maximum power point tracking controller and a solar panel position adjustment means. The present invention provides a method for powering a television according to which ambient temperature is obtained by network connectivity of said television and a maximum power point of said solar battery is dynamically determined.
