Abstract (en)
[origin: WO2014102115A1] The present invention relates to a video recording device (1) comprising a broadcast receiver (2) that receives digital broadcast signals and channel information, a transmitter (3) enables a channel list (L), in which the channels recorded in the memory thereof are listed, to be displayed to the user by means of a display (D), a memory (4), a control unit (5) that provides the recording of a target channel (P1) determined by the user from the broadcast package and the other channels (P2, P3, P4,...) having the same frequency value as the target channel (P1) in the memory (4) and that provides switching between the target channel (P1) and the other channels (P2, P3, P4,...) having the same frequency value as the target channel (P1) while the recording process continues.
