Abstract (en)

[origin: WO2014102448A1] A method for cleaning a surface with the help of a cleaning implement (10) and a cleaning cloth (60) attached thereto, such that the surface (70) to be cleaned is wiped with the cleaning cloth and the cleaning cloth is simultaneously pressed against the surface to be cleaned with a squeegee (30) attached to the frame (40) of the cleaning implement (10) and consisting of elastic material. The cleaning cloth is attached, at two of its edges, to the frame of the cleaning implement such that the cleaning cloth (60) forms a loosely hanging loop or bag, inside which remains the squeegee attached to the frame (40) of the cleaning implement. The position of the squeegee inside the loop can be changed, which means that the cleaning of the surface can be performed using a new, clean spot of the cleaning cloth.
