Abstract (en)

[origin: WO2014095042A1] The invention relates to a block carrier (10) with integrated continuous moulding device (11) for thermosoftening plastics, wherein the block carrier (10) has a block carrier housing (12), a melt pump device (17) for delivering the thermosoftening plastic and a start-up valve (18), and wherein the melt pump device (17) and the start-up valve (18) are integrated into the block carrier housing (12).
