Abstract (en)

[origin: WO2014101971A1] A washing machine (1) having a body with a front wall (2), a drum which rotates in a tub and which has a drum opening for loading and unloading laundry is disclosed. The washing machine (1) further comprises a resilient bellows (3) annularly attached to the tub at its first end and to the front wall at its second end for sealing the drum opening (10). A clamping ring (4) is used for clamping the bellows (3) to the inner side of said front wall (2) of said washing machine (1) and a tension spring (5) is used for attaching the ends of the clamping ring (4).
