Abstract (en)

[origin: WO2014101959A1] The present invention pertains to a washing machine having an improved nanofiltration system. The present invention pertains to a washing machine comprising a water tank (1) for receiving water from a public network. Said washing machine further comprises a pump (2) circulating water from said water tank to a tub (4) in which laundry is treated, a nanofiltration membrane (3) for softening public network water stored in said water tank (1) before feeding into said tub (4).
