Abstract (en)
[origin: EP2942305A1] A hinged-lid package includes a box-shaped containing portion that has an open end at an upper portion, and is capable of containing an object to be contained inside, a lid portion that is rotatably connected to a rear side open edge of the open end via a hinge, and is put on the open end to open and close the open end, a locked portion that is formed at a front side edge portion at a lid portion side that connects a front wall and a side wall of the lid portion, and a locking portion that is provided at the containing portion side, and locks the locked portion when the lid portion is closed.
