Abstract (en)

A bottling plant has a filling unit (3) to feed a product into the containers (2); a capping unit (4) to close the containers (2) with respective caps (5); a labelling unit (6) to label the containers (2); a plurality of starwheels (13) connected to one another so as to feed the containers (2), in sequence, from the capping unit (4) to the labelling unit (6) along a path (P); and at least a control and discard unit (18a, 18b), which is mounted along the path (P) so as to control the containers (2) after capping and discard defective containers (2).
