Abstract (en)

A method of fastening a rail, in which method the rail is fastened by the base part (31) of the rail, wherein the base part (31) of the rail is fastened to a structure of a building by at least one fastening surface (6) provided on a fastener (1), the position of the fastening surface relative the rest of the fastener being fine-adjustable to achieve the vertical straightness of the rail being fastened. The invention also relates to such fastener (1) and the use thereof for fastening a glass rail.
