Abstract (en)
[origin: WO2014098636A1] The present invention relates to a system for securing profile sections (2) of the floor, wall or false-ceiling panel type, which uses a base profile section (1) that supports the profile section (2) and has a groove (3) for engagement of the remaining securing elements. The present invention is essentially characterized in that it comprises: a securing element (4) that engages in the base profile section and secures the profile sections (2); and an end securing element (10). The securing element (4) comprises a rotary component (5) that engages in the groove (3) of the base profile section (1), a securing component (6) proper, which secures the profile section (2), and a body (7) of the securing component that engages the aforesaid two elements.
