Abstract (en)

[origin: WO2014110264A1] An article of footwear includes a sole structure and an upper. The sole structure has a peripheral area and a central area located inward from the peripheral area. The upper is for receiving a foot of a wearer and has an outer layer and an inner layer. The outer layer extends from a throat area of the upper to a lower area of the upper, and the outer layer is secured at the peripheral area of the sole structure. The inner layer is located inward of the outer layer and extends from the throat area to the lower area. The inner layer lays adjacent to the outer layer, and the inner layer is (a) secured at the central area of the sole structure and (b) unsecured between the throat area and the central area of the sole structure.
